Off to Italy

With a much-awaited Formula SAE Italy coming up this month, held between 11th and 15th of July, the combustion prototype left our college on the 8th of June, was shipped on the 16th of June from Mumbai and has reached Italy by the first week of July. The event is being held at Verano de Melegari,

located in the outskirts of Parma province. A lot of extensive research and testing has gone into building this car and our team is ready to tackle the event head on with utmost preparation and confidence. The team looks to better its performances from the previous years and make the nation proud on this global stage.

The Underdog Story

Speaking of underdogs, let's take a small detour to Russia where the FIFA World Cup, 2018 is in progress. What an amazing couple of weeks of world cup we have had!!! With majority of the big guns failing to fire, the underdogs have seized the opportunity to the maximum, both Argentina and Brazil failing to register a win in their opening game with the latter getting knocked out of the tournament, and the Germans facing an embarrassing group stage exit. Many fans have even begun to name it as the 'World Cup of Upsets'.

Coming back to the world of motorsport we have 4 glamorous and thrilling races lined up in the month of July with Lewis Hamilton leading the drivers' Championship which happens to be a cumulative of all the points won by the drivers over the entire race season and Sebastian Vettel right on his tail. A decade ago Sebastian Vettel aged just 21 years; raced on to his first podium finish and the rest as they say is history. Driving for Toro Rosso, Vettel started on pole breezing past Championship contenders Lewis Hamilton and Felipe Massa in the qualifiers. Heavy rain prior to the race meant that all cars used extreme wet-weather tyres. The race began with a safety car as Sebastian Bourdaid stalled on the grid. After the second lap the safety car pulled into the pit-lane Vettel opened up a lead of two seconds over Kovalainen straight after; the McLaren experiencing visibility problems by virtue of the spray off the back of the Toro Rosso. Vettel made his first stop in the 18th lap, by the end of which he had built a lead of 12 seconds over his counterparts. A momentary lapse saw him slip to 4th but pit stops from each of his rivals, Kovalainen, Mark Webber and Felipe Massa meant that he regained his lead. Vettel clung on to his lead to finish off a remarkable race.

For the Love of Racing

Sports, the culmination of talent, hard work and dedication on a single stage. A visual treat, it transcends all boundaries and differences. It brings together all walks of life, where everyone shares a common platform. The wondrous world of motor-sports is no different, with teams and individuals from all nations, creeds religion, etc working together to achieve excellence. It's no wonder why we as Indians love the sport so dearly.

The other main aspect, which draws many a fan amongst us towards motor-sports are the vehicles themselves. We can never get enough of it. The roar of their engines, their elegant design and high precision performance have captivated our attention.

Probably the most exciting feature of the sport for us would be the bitter rivalries which dominate the track. Be it the current Vettel, Hamilton rivalry or the one involving Nikki Lauda and James Hunt, it made for more than just a good watch (on or off the track). We never waste a single moment in discussing who would get the better of the other, or who held the upper hand in an upcoming race, the fight for dominance reigned supreme.

Leading the way

Sathvik Shetty, Team Captain of the Hybrid Project - X9H, works for the Drivetrain subsystem. He is a very cheerful person and has made significant contributions towards team dynamics. Sathvik has ensured that the team faces no difficulties of any sort and has motivated us all to work upto our full potential. He has always bridged the gap between the team members and the team leaders, he's excellent at multi-tasking. He also bonds well with all his batchmates & seniors alike. On a side note, Sathvik is immensely passionate about football. He also plays for the college team and is one of the top players.

Bharath Elangovel, or as he calls himself "Captain Claw", is the Project Manager of X9H. Although he belongs to the Suspension subsystem, Bharath actively helps out in all departments. He is present in the workshop all the time and is found interacting with juniors and seniors as well. He is one of the most dedicated & hardworking team members. Bharath is pragmatic and has made unconditional contributions towards the betterment of the project. He takes deadlines very seriously, ensuring that no team member lags behind. Bharath also shows great interest towards Anime! He is also passionate about F1 and everything else related to Automobiles.

Harish K is the X9H team's Chief Engineer, belonging to the Chassis subsystem and taking care of Workshop management too. Being the most technically sound team member, Harish's technical know-how sets a standard for our team. His leadership skills is definitely going to take us places. He is a very friendly guy and is highly person oriented. Harish comes off as a very approachable person and is easy to work with. Apart from his involvement in Ashwa, Harish is also a fitness freak and is passionate about bikes.

Somya Singhal is the Team Captain of the OSV project, X9OSV. He belongs to the Drivetrain subsystem and is also the HR head of the OSV team. Somya is admired for his intuitive and helpful nature. He is also an excellent influencer, not only to his batchmates, but the juniors as well. He is a highly motivating and never forgets to boost the team's morale at its lows. He carries a positive vibe everywhere he goes and is adored by his entire batch.

Nirmal Suresh is the Project Manager of X9OSV. He belongs to the Suspension subsystem and looks after the administration matters. As a project manager, it is Nirmal's duty to ensure that the deadlines are met and the timelines are judiciously followed. He is known for managing time really well and is highly knowledgeable. Nirmal works very efficiently and is admired for his extremely hardworking nature. He shares a good rapport with all his teammates as he is well-spoken and very polite.

Hrithik Hardi, fondly known as "HardyBoy", is the Chief Engineer of X9OSV. He single handedly manages the chassis subsystem for the OSV project. He is the most technically sound team member of the OSV division and is always up for work. He is very hardworking and is extremely down to earth. Apart from his contribution to Ashwa Raing, Hrithik is highly passionate about photography. Very recently, he's started a blog of his own, called Aureate and has a Photography page on instagram too (@_snapshot_diaries).

ALUMNUS OF THE MONTH

Ayush Pandey, fondly known as Pandeyji, led the Chassis subsystem for the 2016 race season, was part of the first hybrid team which set its benchmarks for the teams to come. The 2016 race season was a milestone in the history of Ashwa, where the combustion timelines were re-instated.

This was indeed a difficult phase wherein the team was challenged to get the car on wheels in a short span of 5 months and Ayush played a pivotal role in the same. Today, if we are able to get our timelines right, Ayush is a major inspiration and reason for it.

One particular memory of his time, which Pandeyji's juniors miss, is his iconic "Flying Chappal". Should you make any mistake, his footwear would come to you at rocket speed, even before you get an opportunity to blink your eyelids, sometimes even faster than the race car!

ALUMNUS OF THE MONTH

Jokes apart, he is the best mentor one could possibly have. His skills and passion in teaching juniors about the technicalities of chassis and vehicle dynamics is what sets Ayush apart from the others.

Till date, if we see any tool out of its place it reminds us of him. Not because he was heading chassis, rather because he never placed the tools back in place, which is quite ironic because, he belonged to the chassis and workshop management team which is supposed to ensure orderliness in the workshop. Having let out these secrets, the writer and editor of this version of the newsletter might soon be the next target for Ayush's "footwear boomerang", when he visits the workshop next time!

Ayush's juniors miss and fondly recall their trips to the market with him, for they had an opportunity to interact closely and bond with him on a friendly, personal level.

Being in the chassis subsystem never stopped him from doing any other work. He worked on Engine, Brakes, suspension, and also played an instrumental role in the re-wiring the combustion prototype.

He was also the driver of X6 - combustion prototype. He cared for the car like it was his own baby, but that didn't stop him from releasing his foot from the throttle and taking the car through the roads and bumps in the college.

His presence in the workshop created a very positive atmosphere for the team to work in. He still takes out time to meet the team and help them to the best of his abilities.

On an ending note, here's a small message from Ayush's immediate juniors: "Pandey bhaiya we miss you loads, we remember our chassis welding sessions with you, and then breaking the components during testing. After all, you were our soul motivation for us to work on newer and better aspects of chassis structure."

Thank you Ayush, for making us do what we never knew we could and for shaping our cars towards a better engineered vehicle.

SPONSOR FOCUS

Werner Finley, a hundred percent Indian company that provides the widest range of process cooling solutions for a wide array of applications believe in delivering innovative, customized and high-quality process cooling solutions to their customers. With over 3 decades of experience in the industry, today Werner Finley is the leading manufacturer for process cooling equipments in India with a rapidly growing global presence. The team would like to thank Werner Finley for their continued support and encouragement, going into the 2018-19 Race Season.

Mallar Group, a full service structural steel, steel fabrication & steel machining solution provider has been a sponsor of Ashwa Racing over the years by helping the team with the milling of the base plate and fixtures required to fabricate the prototypes. The team extends its heartfelt gratitude to Mallar Group of Industries for their unabated support towards the Ashwa Racing endeavour and a special thanks to Mr. Irfan Kazi for motivating the team to learn from its mistakes and work towards becoming better engineers. The team hopes to strengthen this relation in the future years to come.

Strategi Automation is an ISO 9001:2015 certified company in the business of Machine Manufacturing, Factory Automation and Motion Control. We have in house strengths in Mechanical and Electrical Design, Manufacturing, Assembly and Installation providing delight to customers with economical, reliable and high performance products in speedy delivery times. The company has a vision to be the foremost motion control solution provider in India. Ashwa Racing whole heartedly welcomes Strategi Automation to our family of sponsors for the 2018-19 race season.
