SEASON 2015 -16

अश्वा RACING
LIVE IT. LOVE IT. RACE IT.

IN THIS EDITION

Dear Readers,

Ashwa Racing's 2015 season began with a simple word: Evolution. RZ-X5C was designed to attain

- ⇒ Better standards of serviceability.
- ⇒ Ensuring the car clears scrutiny in first attempt.
- ⇒ Overcomes the shortcomings of the previous car.

Major changes to the car were made in order to achieve a better all round performance. These changes also implied taking risks, but the race results vindicated the choice of decisions.

RZX6C and RZX6H have completed their design phase and are currently under going their manufacturing phase.

RZ-X5C

अश्वरा RACING

The RZX5-C participated in FSAE Italy from 11th - 15th September 2015. And the car stood up to the expectation during the entire event that was reckoned in the design phase by the team. Most importantly one can proudly say that during the 2015 season, we dramatically improved in various technical aspects.

The most significant ones being:

- ♦ Steering effort reduced without tampering the original geometry after suggestions from design judges from FDC.
- ♦ The engine power output increased by 40% due to improved intake and exhaust manifold design.
- The intake manifold was rapid prototyped for the first time in the history of Ashwa Racing. Its mass was, when compared to that of the previous model was 70% less.

RZX5-C

Design Report being presented to the officials

- Problems faced in FDC with pneumatic gear shifting was eliminated.

Overall, the car was well packed and assembled. This was appreciated by the design judges.

The car has under gone testing within the college premises for 75Km. Several issues with the engine came up during this exercise. To address these problems, the engine was transported to the event at the later date.

At the event, the team put up a good performance in static events. We secured 12th position in the cost event, 14th position in the business presentation event, and our designs were appreciated by the judges.

Business presentation in progress

RZX5-C

We did overcome technical inspection without a hitch. This was an achievement, given that the team faced some minor glitches during FDC. The upper limit for noise is marked at 110dBC. The engine noise was measured at 100dBC. Clearing the noise regulations with a large margin was another remarkable achievement for the team. Challenges were faced during dynamics. Weather conditions were adverse as it was raining. The car had to be run on wet tires.

To summarize, this event was another good learning experience for our team. We had a few shortcomings in our designs which we will eliminate in subsequent prototypes. We secured an overall position of 34 out of 70 registered teams.

Ideas are sparked with great passion and the hunger to do something different. Taking the paths that the weak hearted will think twice before choosing is what makes Ashwa Racing team a cut above the rest. For it is one of the most consistent and sustainable Formula Student Team in the World. Besides that, it is the only team to make both combustion and hybrid prototypes in a year and participate in various events.

From 26th August to 1st September at Asilomar Conference Centre California TED organised TED FELLOWS RETREAT 2015. Here representing RVCE - Ashwa Racing Documentary was screened and appreciated for its initiatives and ideas. Such an event triggers and infuses higher spirit into the young minds of the budding engineers. Such a honour we could not have achieved without our sponsors and their continued support.

Asilomar Conference Centre

Sponsor Focus

The manufacture of both RZX6 AND RZX6H have set in motion. Necessary raw materials have been procured and have been transferred to various manufacturing partners for fabrication.

Mallar Group of industries is a large scale steel fabricator. They are a full service structural steel, steel fabrication & steel machining solution providers and are an industry leader in high definition plasma cutting. Mallar group has helped us with the machining of the base plate. They also provided us with raw materials for the fixtures, to fabricate the chassis. We heartily thank mallar for their support.

Dynamatic Technologies Limited designs and builds highly engineered products for Automotive, Aeronautic, Hydraulic and Security applications. With futuristic design, engineering and manufacturing facilities in Europe and India, the company is able to meet customers' exacting requirements on 6 continents. Dynamics helped us out with CNC manufacturing of various components for the car.

Sponsor Focus

Magod Laser is a company which specializes in non-conventional machining. Since its foundation in 1997, the Magod Laser has consistently built recognized expertise, in field relating to laser applications for numerous industries.

Our chassis tubes have been laser cut and profiled. Magod also helps us in water jet machining.

Continental provided us with dry tyres and wet tyres for the 2016 season. They have also been very supportive by helping us monetarily. We are extremely thankful to Continental for the continued support.

SPONSOR FOCUS

Harman is a global leader in audio and infotainment systems. We welcome Harman International to our Hybrid family.

SCHAEFFLER GRUPPE

Schaeffler Group has helped us fulfil our requirement with the bearings. We thank FAG Schaeffler and INA for their continued support.

Controlwell is a leading distributor of quality Cable Protection and Management products in India. We have Controlwell to thank for the components Conduits, Connectors, junction boxes and grommets.

SPONSOR FOCUS

बड़ेबा RACING

Norbar Torque Tools Ltd is one of the world's largest specialists in the field of torque tools. We thank norbar for providing us torque wrenches.

Motul an industry specialist in high performance motor oils and industry lubricants helps us meet our oil and lubricant requirements. We thank motul for the provision of all required fluids.

Grind Master: Grind Master began indigenously metal finishing machines from 1984. And with the passage of time they have the widest ranges of Special Purpose Machines for various finishing purposes, to suite every industries needs. Grind Master today makes a very wide range of machines, and are amongst the group of elite World Class Machine builders.

Alumnus of month

GOKUL KRISHNA

Gokul was the chief engineer of the 2014 team. He currently works gas delivery systems and motor design in Applied Materials.

He worked on chassis, drivetrain and managed manufacturing of the 2014 car. The 2014 chassis, considered as the benchmark in Ashwa Racing, is the handiwork of Gokul.

He continues to help us extensively, from suggestions in chassis and suspension, to providing us with alternate and better manufacturing ideas. He recently helped us in design, validation and evaluation of the 2016 car.
