En route to New Hampshire

With the Hybrid event less than 2 months away, it's that time of the year again. The hybrid prototype will be leaving Chennai port in the first week of March and arriving at New York by the 18th of April. Backed with extensive testing and improved power train system, the RZ- X9H is all set to shatter our previous accolades at New Hampshire Motor Speedway.

The team is confident and all set to take the bull by the horns.

Testing - Non stop

After an exemplary performance at Formula Bharat, earlier this race season, the RZ-X8C is currently under rigorous testing for the next four months. The testing includes incorporating changes in the current prototype so as to outperform the participating teams, in FS Italy 2018.

One of the major changes brought about was that the engine mounts were redesigned : Previously, flexing of engine mounts caused dynamic slack in the chain, resulting in the chain hitting the engine mount. The changed mounts would help the car complete the Endurance event, effortlessly.

Testing on the suspension was done as well; changes have been made in the anti roll bar set up, to control understeer and oversteer effectively.

The car faced overheating issues, earlier this race season. To overcome this technical snag, experiments have been conducted on the cooling circuit, to ensure that the engine maintains a constant temperature of 85 degrees. This is done by calculating the mass flow rate which would in turn help us arrive at the appropriate heat transfer rate.

Fixtures were also manufactured, for adjusting toe and camber plates were manufactured to enable measurement of the toe and camber of the car, making way for an enhanced car setup through the event. A brake pressure sensor was installed, to ensure that the brake system is bled properly and to validate the braking system design. On an average, the car has run for 240 kms over the last three months to ensure that we face no other technical snags at the Italy event.

Our best wishes to RZ-X8C team for FS Italy 2018!

New voices in the workshop

“ My experience throughout the recruitment process went very well. There was a lot of coordination among the seniors in the recruitment process and in the execution of the same. The levels through which we were recruited, from the test to the interview was planned very well. The seniors were open minded and were helpful in clearing any doubts through the way. Also the experience at IMTEX 2018 as a part of Ashwa Mobility Foundation was great. I learnt alot from interacting with companies and analysing their interest in such projects. “

- Dheeraj, Mechanical Engineering, 1st year

“ My journey in ashwa has been very professional. The intense tests, interview as well as the rigourous experience we had during the kart event made us, not only professional but also a team as a whole. Our productivity became from satisfactory to copacetic. After all this we still have the urge to learn and experience all the exciting outcomes we will be going through, with the guidance of both our seniors and our alumni. Overall, I'd like to thank Ashwa and the seniors who made Ashwa as a home to me and a family too. “

- Rahul, Mechanical Engineering, 1st year

“ The Ashwa experience has been quite interesting. We started off with the aptitude test and interview. These two weren't too difficult. Then came the real challenge which was also quite memorable. It was the kart event. That night before the kart event when we were working on our karts at K R Market turned my team mates from friends into family. I look forward to more such memorable experiences through my journey at Ashwa. “

-Vinay, Mechanical Engineering, 1st year

#Girl power

”

"When you put the helmet on, it doesn't matter if you are woman or man: your mission is to compete to win"

-Milka Duno, racecar driver

Amidst the buzz of deadlines and tasks, the team had an open day at the workshop, where in Ashwa Racing members of all the four years were allowed to drive the cars around the college to embrace and truly feel the formula student experience. Shoulder to shoulder with all the others, were none other than the women of Ashwa Racing, who have set themselves apart as the cornerstones of the team, with their enviable work ethic and never-say-die approach, standing proud, as testimonials to the fact that any and every pursuit transcends the boundaries of gender. The Team had a great time and cheered maybe just a little louder in support of the wonderful girls as they grabbed this opportunity and drove the car fearlessly and with an intense amount of passion. Ashwa Racing did by no means miss out to flaunt this event in its appreciation post for women's day on social media, which followed soon after in the month. The team looks forward to having more such enthusiastic & passionate women enter the field of student motorsports.

SPONSOR FOCUS

www.icp-india.com

ICP (India) Pvt. Ltd. is one of the pioneers in field of composites in India, involved in manufacturing various composite products using Glass, Kevlar, and Carbon

Fiber for a wide range of industrial and commercial applications ranging from Aerospace, Construction, Chemical, Electrical, Electronic & Transportation industries. The team is grateful to ICP for extending their support towards the Ashwa Mobility endeavour for the 2018-19 race season.

SuMax Enterprises Pvt Ltd., earlier SuMax Precision, is a part of Suttatti group of companies, a diversified business group involved in multi-fold activities such as Precision Machining, Sheet Metal Fabrication, and Grating Manufacturing and now further diversified into high end Metrology Solutions. Sumax Enterprises is one of the pioneers in the Precision machining industry. We welcome Sumax Enterprises to the Ashwa Racing Family.

G. V. Enterprises, are one of the premier industries in the field of anodising and fabrication of Solar Module Frames since 1992, specialised in the field of anodising and electro colouring of all profiles. The team thanks G. V Enterprises for their continued support in anodizing components of the Combustion prototype.

SPONSOR FOCUS

Dynamatic Technologies Limited designs and builds highly engineered products for Automotive, Aeronautic, Hydraulic and Security applications. With futuristic design, engineering and manufacturing facilities in Europe and India, the company is able to meet customers' exacting requirements on 6 continents. The team is extremely grateful to Dynmatic Technologies for their continued support in manufacturing the uprights of the prototypes.

Lore Software Solutions, a Bangalore, India based IT services company, provides software development, quality assurance, product certification and operations management services and specializes in the BFSI and Content Management domains. The team extends its heartfelt gratitude to Lore Software Solutions for their financial support for the 2018-19 race season.

A global supplier of manufacturing technology products and services primarily focused on CNC machine tools (metalworking), Phillips Corporation is a unique community of high performers – a work in process

– dedicated to rapid paced continuous improvement for the purpose of providing unusual levels of productivity and service to its customers. The team is delighted to have Phillips Machine Tools as a Silver sponsor for the present race season.

ALUMNUS OF THE MONTH

Vamsi Naramsetty was a part of the core Brakes and Logistics team of Ashwa Racing from 2012 to 2016. His 4 years at Ashwa Racing are a story of enthusiasm and dedication. He worked on both the RZ-X5H and RZ-X6C prototypes.

Vamsi has always been looked up to, for advice by his juniors and teammates alike. He has been one of the go to persons for the current Brakes and Logistics teams when they need suggestions.

During his tenure, he was known for keeping calm in challenging situations. He has worked tirelessly for the benefit of Ashwa Racing. His ability to come up with quick and inventive solutions hasn't gone unnoticed by the team.

His focus of work was on the Brakes Subsystem on the car. He was also appointed as the mentor for the Subsystem post his tenure, owing to his immense technical expertise.

Even after graduating from college and completion of the project he has been in regular touch with the team and juniors. He meets the team often, in order to check their progress and that of the project as a whole.

He is currently working as a Design Engineer for Continental India, a testament to his brilliant technical know how. Despite being occupied by work at Continental, he has kept himself associated with the team and Formula Student competitions. He was also a volunteer for Formula Bharat 2017.

Vamsi is as spirited as they come. He has been an irreplaceable asset to the team and he will continue to be one, through his selfless contribution.
