**VISION
AND
MISSION**

GUIDING PURPOSE,
INSPIRING FUTURE.

> MISSION AND VISION <

VISION

- To be the national leader in all categories of Formula Student, to push the limits of engineering and compete in events at the highest level.
- To foster student mobility solutions in the future by developing sustainable prototypes across various domains.

MISSION

- Prepare students for the industry by designing and building world-class vehicles while facilitating industry interaction.
- Showcase India's engineering expertise in mobility on a global stage and provide talent opportunities for the industry.
- Develop cost-effective, sustainable transportation solutions for the masses.

**ENGINEERING
SPEED FOR THE
TRACK**

ASHWA RACING'S DRIVE TO
FORMULA BHARAT 2026

ASHWA RACING SETS THE PACE FOR FORMULA BHARAT 2026

Ashwa Racing is proud to announce that we have officially registered for Formula Bharat 2026 with our combustion vehicle, The RZ - XX6C. As per the competition's procedure, registration is determined through a mandatory quiz, which took place on 3rd May 2025. This quiz evaluates each team's knowledge and understanding of the Formula Bharat rules and guidelines, ensuring that all registered participants are well-prepared to engage with the technical and regulatory framework of the competition.

In preparation for this crucial step, Ashwa Racing undertook a rigorous training schedule that included a series of mock quizzes and timed practice sessions. These efforts were aimed at sharpening both accuracy and speed, key factors in the quiz's competitive structure.

We are pleased to share that Ashwa Racing secured the 8th position in the quiz, and will participate in the 2026 competition under the registration tag C08. This strong result is a reflection of the team's focus, discipline, and collective effort in the early stages of the competition season.

With registration complete, Ashwa Racing is now fully immersed in the development phases of XX6-C. From design and analysis to fabrication and testing, each phase is being tackled with the same precision and drive that marked our quiz preparation.

The journey to Formula Bharat 2026 is officially underway, and Ashwa Racing remains committed to pushing the limits of engineering excellence and collaborative innovation.

ASHWA RACING
2026:
LEADERSHIP
UNVEILED

THREE LEADERS. ONE TEAM.

AMITHA A.V.

Team Captain, 2026

I joined Ashwa Racing as a first-year student with little to no knowledge about cars. I remember walking into the workshop for the first time, my first thought being “this is so cool”. But I never really knew how much engineering went into building one of these cars. Today, I understand the attention to detail and hard work that goes into making every single component. Ashwa Racing has given me the platform to apply the concepts I learn in the classroom to build a race car. The core value of Ashwa Racing is engineering. True to this, I’ve seen all fields of mechanical engineering applied from the design of a component to its manufacturing. I will forever be grateful for everything Ashwa has given me.

KRITIK MODAWEL

Project Manager, 2026

Hi, I’m Kritik Modawel, Project Manager at Ashwa Racing. To me, Ashwa Racing is the first step toward fulfilling a childhood dream – to build a race car. I’m committed to living in the world of motorsports and nothing else. In my eyes, Ashwa Racing is something special – the way we operate as a team, the challenges I face as Project Manager as well as a Vehicle Dynamics Engineer, and how it simultaneously teaches me about the worlds of engineering and business. Being a part of this 21-year-old family has helped me grow as a person, an engineer, and a leader in ways I cannot begin to describe.

GAURAV RAJU

Chief- Engineer, 2026

I'm Gaurav Raju, Chief Engineer for the Formula Student project at Ashwa Mobility Foundation, 2026 batch. My journey from dismantling appliances as a curious child to leading engineering efforts at Ashwa Racing has been incredibly transformative. Specializing in the Chassis subsystem, I've gained deep insight into vehicle dynamics, structural design, and manufacturing processes. Ashwa Racing has sharpened my technical skills across both EV and combustion platforms, and I'm now focused on driving innovation, ensuring design validation, and delivering a high-performance car that reflects the team's collective ambition.

ALUMNI CORNER

CONNECTING MEMORIES,
BUILDING FUTURES!

ALUMNI CORNER

Dennis Matthew, a 2024 engineering graduate, was an integral part of Ashwa Racing's MotoStudent team – a project that blends design, manufacturing, and real-world racing challenges. In this conversation, he shares how the experience shaped his technical approach, leadership skills, and the importance of seeing beyond just your own role.

Q: Looking back on your time with Ashwa Racing, what were some key technical or hands-on experiences that significantly influenced your approach to engineering today?

Due to the smaller team size of Moto Student, the seniors' and our team were merged together. I at the time was helping out a bit on the chassis design and loads simulation. And I learnt that sometime you need the big picture of the entire system. If you start working with narrow vision, you'd lose out on optimizing and improving the system as a whole. One small change locally would mess up the global system.

Q: Were there any specific challenges or projects you tackled at Ashwa Racing that pushed you to grow, either technically or personally? How did you overcome them?

When we were trying to reach out to sponsors, I was helping out a few of the SMP with shortlisting and participating in the meetings together.

During this I learnt that there's always a way to grow and learn. When we were in the sale's pitch meetings with the sponsors, we were always learning and finding new opportunities, the sales representative would sometimes explain a better way to have designed the component that we would be proposing .

Q: How did being part of a collaborative, multidisciplinary team like Ashwa shape your problem-solving or communication skills in your current role?

Looking back, there was a time when during the phase A for the moto student contest we were running a little late on our designs. This was during when we barely had people for the team already and as such there were very few people in the Moto Student team. I managed to get the entire team to help each other out a lot. And thereby we were able to clear the phase 1 evaluation.

This helped me improve a lot of my soft skills, because, co-ordination between everyone was key and maintaining that was quite hard

From hands-on design to sponsor pitches and tight deadlines, Dennis's time at Ashwa Racing wasn't just about engineering , it was about adapting, leading, and thinking system-wide. Lessons that clearly continue to shape his work today.

**DRIVEN BY
SUPPORT**

A TOKEN OF THANKS TO OUR
SPONSORS

ICP

Founded in 1984 by a team of engineers from MICO-Bosch & National Aerospace Laboratories, ICP (India) Pvt. Ltd. is one of the pioneers in field of composites in India. Today the manufacturing facility spread over 30,000 sq ft in Bommasandra Industrial Area, Bangalore is involved in manufacturing various composite products using Glass, Kevlar & Carbon Fibre for a wide range of Industrial & Commercial Applications.

MAGOD LASER

Magod Laser, founded in 1997, is a leading provider of laser-based manufacturing services in India. With facilities across key locations, they specialize in laser cutting, welding (NADCAP certified), metal 3D printing, cladding, and more. The company also offers design support and value-added services to optimize manufacturing processes for various industries.

MOTUL

Motul is a French company founded in 1853, specializing in high-performance lubricants and engine products. Known for its synthetic oils, motor oils, coolants, and metalworking fluids, Motul serves industries and motorsports, partnering with teams in MotoGP and Le Mans. The company ensures top quality with international certifications like ISO 9001.
